

NEMIX User Manual

Screenshots with numbered functions and practical steps

For Supply Coordinators, Property Custodians, inventory staff and administrators. The screenshots were supplied by the user on 03 Oct 2026. The numbers placed over each screen match the instructions below it. Available actions depend on role permissions.

1. Find a function from the dashboard

1. Select **Dashboard** for totals, stock alerts and recent activity.
2. Select **My Requests** to submit and track supply requisitions.
3. Expand **Inventory** for All Items, Receiving and Issuance.
4. Open **RFID Scanner** for tag assignment and scan work.
5. Use **Suppliers**, **Compliance**, **Audit Logs**, **Access Control** or **System Settings** when your role allows it.
6. Select **Manage RFID Hardware** to investigate the tagging alert.

2. Submit a supply request

Create Supply Requisition (RIS)
Administrative Requisition & Issue Slip (RIS) Entry for Property Custodian Review

1. RECIPIENT INFORMATION

Recipient Name * **1** System Administrator Date Requested * 10/03/2026

Division / Office * Select college, unit, or office... Recipient Designation e.g. Dean, Department Head, Faculty, Coordinator

2. ACCOUNTING INFORMATION

Fund Cluster **2** 01 - Regular Agency Fund Purpose * Purpose of supply requisition

3. ITEMS REQUESTED + Add another item

Item #1 * **3** Search item by name or SKU... On-Hand Stock - Qty * Qty

4. AUTHORIZATION (SYSTEM SIGNATORIES)

APPROVED BY (SECTION B)

Name (Read-Only)	Designation (Read-Only)	Approved Date (Read-Only)
ARSENIO GEM A. GARCILLANOSA	SUPPLY OFFICER III / ADMIN OFFIC	Pending Custodian Approval

ISSUED BY (SECTION C)

Name (Read-Only)	Designation (Read-Only)	Issued Date (Read-Only)
ALBERTO DE VERA JR	STUDENT ASSISTANT	Pending Item Release

Cancel **4** SUBMIT SUPPLY REQUEST

1. In **My Requests**, select **New Request**. Enter recipient name, date, division or office, and designation.
2. Choose the fund cluster and enter the purpose.
3. Search for each item, enter the requested quantity, and use **Add another item** as needed. Check on-hand stock.
4. Review the read-only authorization section, then select **Submit Supply Request**.

Submitted requests appear in My Supply Requests. A Property Custodian reviews them under Inventory > Issuance.

4. Print or download the RIS

[illegible]

1. Confirm the RIS reference, recipient and form header.
2. Check the requisition and issue quantities before handover.
3. Select **Download PDF** to keep a copy.
4. Select **Print** for the signed paper workflow.

Approval reserves quantities. Stock is deducted when the custodian confirms physical release, not when the request is first approved.

5. Search the item master

1. Open **Inventory > All Items** and search by name or SKU.
2. Filter the list by supplier.
3. Filter by status, including Available, Low Stock or Out of Stock.
4. Select **Add Item** to register an item master.
5. Use **View** to inspect its stock and receiving batches.
6. Use **Edit** to change the item identity fields, if permitted.

6. Register a new item

Register Item Master
Create a standardized catalog entry for university supplies.

ITEM INFORMATION Available

Item Name *
e.g. A4 Bond Paper 80 GSM

Unit of Issue *
Select unit (e.g. ream, piece, box)...

Description / Specifications (Optional)
Specifications, dimensions, material, or packaging details...

INITIAL RECEIVING BATCH OPTIONAL
Specify initial baseline stock and preferred vendor

Preferred Supplier **Supplier Stock No. / SKU**

Select supplier... Auto-generated with vendor

Initial Stock	Unit Cost (P)	Batch Total
0	0.00	P 0.00
	0.00	
		0.00

Cancel Save Item Master

1. Enter the required item name.
2. Select the unit of issue, such as piece, ream or box.
3. Optionally enter specifications or a description.
4. In **Initial Receiving Batch**, choose a preferred supplier and enter initial stock and unit cost when needed. The supplier stock number is generated automatically.
5. Select **Save Item Master** and check the new row in All Items.

7. Inspect an item and its batches

Close Tag RFID Edit Item Identity

1. Select **View** on an item row and verify the stock number, unit, total on-hand quantity and valuation.
2. Read the item description and specifications.
3. Inspect **Receiving History & Active Batches** for supplier stock numbers, received and remaining quantities, and unit costs.
4. Use **Tag RFID** if the item needs a hardware tag.
5. Select **Edit Item Identity** to update name, unit or description.

The edit form shows current stock and valuation as aggregated values from active batches. Use receiving or issuance transactions to change stock.

8. Edit an item master

Edit Item Master ×
Update standardized item master specifications.

-----------------------	------------------------------------	--------------------------

Cancel ✓ Save Changes 5

1. Open an item with **Edit** or **Edit Item Identity**.
2. Correct the item name and unit of issue.
3. Update the optional description or specifications.
4. Check the current stock and valuation display. These totals are derived from batches.
5. Select **Save Changes**.

9. Record a receiving transaction

Record Receiving
Register incoming inventory delivered to the university.

INVENTORY ITEM *
Search and select an item...

SUPPLIER * Deliveries can be received from any vendor
Select supplier...

SUPPLIER STOCK NO. **AUTOMATIC**
Generated automatically after selecting an item and supplier.
Automatically generated per receiving batch and retained for RPCI reporting.

QUANTITY RECEIVED *	UNIT COST (P)	BATCH TOTAL (P)
e.g. 50	0.00	P0.00

DATE RECEIVED *
10/03/2026

Cancel **Save Receiving**

1. Open **Inventory > Receiving**, then select **Record Receiving** and choose the inventory item.
2. Choose the supplier.
3. Check the automatically generated supplier stock number.
4. Enter quantity received and unit cost; review the calculated batch total.
5. Choose the date received.
6. Select **Save Receiving** and verify the record in the list.

10. Inspect a receiving record

Receiving Record Transaction Reference: 1

ITEM	A4 Bond Paper
SKU / CODE	2 -26-89-001-0001
SCANNED ITEM-TYPE TAG	E2843611000010000FD08ED5
SUPPLIER	Camarines Office Supplies Trading

Update Receiving

1. Open the row's **Update** action and confirm the selected inventory item. An RFID-originated item can be locked for traceability.
2. Choose the correct supplier if needed.
3. Keep the automatic supplier stock number associated with the batch.
4. Correct quantity received or unit cost and verify the recalculated batch total.
5. Correct the date received.
6. Select **Update Receiving** and review the updated record.

12. Receive with RFID

The screenshot shows the 'Scan RFID Receiving' interface. At the top, there's a title bar with a close button (X) and a status '0 / 100 Items'. Below the title bar, there's a section for 'Station Hardware' with a dropdown menu labeled 'Select a scanner for hardware input' (callout 1) and a 'Station ID' field. A note below says 'Select a scanner - Ready for keyboard, manual, or hardware scans.' The next section is 'RFID TAG SCAN OR ENTRY' with a text input field 'Scan tag with hardware reader or enter tag and press Enter' (callout 2) and an 'Add Tag' button. Below that is a 'Scanned Items (0)' section with a note 'Confirm inspected quantities and costs before receiving · All lines save atomically'. The main area shows 'No RFID tags scanned yet' (callout 3) with a sub-note 'Point the station RFID reader at items, scan with a barcode wedge, or type a tag above.' At the bottom, there's a 'DATE RECEIVED' field (callout 4) showing '10/03/2026' and a calendar icon. The bottom right has 'Cancel' and 'Receive Items' (callout 5) buttons.

1. From **Inventory > Receiving**, select **Scan RFID** and choose station hardware if available.
2. Scan a tag with the reader or enter a tag manually, then select **Add Tag**.
3. Review scanned items and enter inspected quantities and actual unit costs before saving.
4. Select the date received.
5. Select **Receive Items** and confirm the resulting records.

For supplier setup, compliance reports, access control and system settings, use the corresponding sidebar modules. These screens were not included in the supplied screenshot set; the technical manual maps their routes and owners.
